SCIENCE CARE PROVIDES FUNERAL DIRECTORS WHOLE BODY DONOR PROGRAM EDUCATION

PHOENIX, AZ (Sept. 29, 2008) — Science Care hosted a successful education program for funeral directors, the first event of its kind in Arizona. Funeral Homes and Accredited Non-Transplant Tissue Programs: Caring Collaboration for the Future was open to funeral directors and examined the ways funeral homes and accredited non-transplant tissue programs can cooperate to help future generations.

“So many funeral directors were contacting Science Care to learn more about our program,” said Donna Goyette, Science Care’s Director of Community Relations. “We were able to educate funeral directors about programs such as organ donation, medical school donation, and whole body donation and discussed how funeral homes and accredited non-transplant tissue programs can work together to benefit humankind.”

This event was approved by the Arizona State Board of Funeral Directors and provided continuing education to funeral directors in attendance on Wednesday, September 24 at the Science Care training facility in North Phoenix.
